CRITERIA	DIALOG / GOAL DEFINITION	TERMINATION OF ENGAGEMENT
<ul style="list-style-type: none"> – High ESG risk: Material Risk Engagement (MRE) – Thematic engagement (e.g. sustainable forests) 	<ul style="list-style-type: none"> – Definition of firm ESG-goals in cooperation with investee company 	2 possible outcomes: <ul style="list-style-type: none"> – Objective achieved («case resolved») – Objective not achieved resp. company is not cooperative *

*Assessment to consider adding to exclusion list

ESG Integration

Source: https://www.lazardassetmanagement.com/docs/-m0-/669/SustainableInvestmentAndESGIntegration_en.pdf

Yes. The EMD team's proprietary research on each issuer under consideration for investment includes assessment against a proprietary sustainability scoring model for discrete environmental, social and corporate governance issues – i.e. the scoring model is designed to identify issuers with strong or weak practices relating to pollution, energy use, food security, education, employment, poverty, healthcare, human rights, political stability, and gender parity, among other matters.

Engagement

Lazard Asset Management's engagement framework and activities are described in the annual Sustainable Investment Report and its Stewardship Report.

Sustainable Investment and ESG Integration

As an active manager with a strong focus on fundamental research, Lazard Asset Management's (LAM) investment professionals have been incorporating an assessment of human and natural capital, alongside governance, into their research, engagement and decision-making process for many years to enhance long-term financial returns. Each portfolio management team is responsible for determining the ESG issues that are most relevant to its asset class, investment objective and investment process. And LAM believes that a more holistic approach within its investment decision making process helps them to mitigate risks and identify opportunities. It also plays a key role in its ability to provide innovative solutions to its clients' investment challenges.

LAM's investment processes draw on the proprietary research and financial analysis conducted by a team of more than 310 investment professionals including 112 analysts. Investment professionals conduct research to analyze and understand a company's business fundamentals and they see ESG considerations as an integral part of this. The research effort is supported to access to third party data (e.g. CDP), third party ESG scores by specialist providers, and the growing amount of ESG research produced by sell-side financial analysts. Companies themselves are producing more Corporate Social Responsibility and Sustainability reports, details of consumption and emissions, and science-based targets for the future

To ensure a systematic and firm-wide approach to ESG research, LAM has built its own dynamic, global proprietary process called 'Materiality Mapping' which helps them to identify the risks and opportunities on a sector-by-sector basis. Research analysts have performed deep dives on individual issues and developed frameworks for their assessment and quantification which can be accessed by all Investment Professionals.

Next steps and further developments

Our Net Zero Asset Mangers initiative commitment requires us to set an interim target for 2030, consistent with a fair share of the 50% global reduction in CO₂. Lazard will commit 9% of its total AUM to be managed in line with a net zero trajectory in its first disclosure, consisting of client mandates that already have climate as a part of the mandate requirements and strategies for which the portfolio manager sees net zero as being aligned with the existing investment philosophy and process. We anticipate that this figure will increase over time, as more of our clients explore how best to have their assets managed in a way that is consistent with a net zero approach.
