Investment Approach and Sustainability

The individual MIXTA OPTIMA investment groups are structured as funds of funds and differ only in the standard ratios and bandwidths for the investable asset classes. The broadly diversified investments are implemented almost entirely by means of IST and IST2 investment groups, supplemented in individual cases by complementary strategies.

With few exceptions, the management of the investment groups is in the hands of external portfolio managers. Their selection is based on IST's broad best-in-class approach, which has proven its value over many years. This focuses not only on performance and risk indicators, but also on the successful and seamless integration of ESG criteria into the investment and risk control process of the external asset managers. These criteria are analyzed in a detailed Operational Due Diligence („ODD“) prior to mandating the portfolio manager and are regularly monitored onwards. Since 2013, a basic prerequisite for the award of a mandate has been the signing of the UNPRI by the portfolio manager.

As described, ESG inclusion takes place at portfolio manager level, but also at IST level. As a company, IST accepts its responsibility towards all stakeholders and has enshrined aspects of sustainability in its mission statement and corporate strategy. As an investor, IST illustrates this, among other things, by consistently exercising voting rights for its equity investments in Switzerland and abroad. This approach is supplemented by engagement where necessary. The approval of IST's ESG policy and its implementation are the responsibility of the Foundation Board Committee „Corporate Strategy & Organization“ (STRA-UO).

IST publishes its own sustainability report on an annual basis.
